

Best Cryptocurrency Marketing Service

Bitsbanking is professionally engaged in development of new technologies of mining, not only the main [crypto currency](#) – Bit coin, but also its new alternative types of [digital money](#). We don't make a major bet on Bit coin because of its low volatility and high cost of today's mining that are no longer attractive to earnings. Instead, we have chosen a strategy to support a [dozen derivatives](#) of Crypto currency which are promising thanks to the efforts of thousands of enthusiasts around the world involved in their development. Now Forks trade has considerable experience in the field of research and development of crypto mining. In the period from 2013 to 2014 the company purchased and put into operation [mining stations](#), which allows us to effortlessly and consistently generate cryptocurrency.

We have decided to update our technical base following continuous growth of mining hardware requirements. To be competitive and to reach all the objectives we are engaged in attracting private capital, which we use to buy modern cutting-edge software and hardware design as well as new technologies for [crypto mining](#). Technological activities allow us to not only offer the best conditions for investors, but also to fulfill our commitments in a form of timely payments.

To demonstrate the seriousness of our intentions, we have officially registered our company, it is in the area of jurisdiction of Great Britain and controlled at the legislative level.

[Bits banking](#) investors can be confident in the reliability of the company and our plans for the further business development.
